It is proposed to commence a canal on the western shore of Italy, just above Civita Veo chia, at Castre, and to cut through to Fano on the eastern or Adriatic shore. A glance at the map of Italy will show that in this line two lakes are met, those of Bolsens and Trasimenc, and it is proposed to drain these two lakes, thus securing the area for cultivation. The length of the canal will be about one hundred and sixty-nine miles, the width of 110 yards and its depth i said to be about thirteen yards, so that ships of any tonnage, and even men-of-war, will be able to pass through it. > A traveller who returned from a two weeks vacation among the Maine watering places, relates an amusing incident that occurred at the New England hotel where he chanced to stop for a day while journeying to Bar Harbour. The hotel was a small one, and the principal parson in charge of the office was the daughter of the proprietor, a buxom lass of probably 20 summers; When the morning of departure came this fair Dama presented the hotel bill to the traveller, and it so happened that poither of them could change a note that was tendered in payment. In a gallagt way the traveller, who had something of the Don Juan in his nature, smilingly offered to kiss the young lady and let the change go. She drow herself up haughtily. "I'd like you to know, sir, that in this hotel we don't ki s transients," she replied infreezing tones. "Fuch Will you take a prospectus for next season?"

It is in contemplation to erect a colossal statue if Joan of Arc either in Paris or on one of the heights in its immediate neighbourhood. I am in a position (writes a Petersburg correspondent) to state that the Minister of Finance will not take into consideration the petition of Russian merchants assembled at Nijni Novgorod in which he is requested to withdraw the commercial privileges promised to Captain Wiggins and any other fearless mariners, who like to do trade with Silveria, via Yeniseisk. It is different with regard to the other request of the same merchants respecting Persin. They are anprehensive that this market, which they have been for generations toiling to open up, and which the late changes in B. toum and the abolition of the Transcauchian transit have made almost their own, will be matched from them again by the comning of "perfidious Albion." Hence they proposed to expend any amount of capital in constructing srailway line to Teheran, but they ak for a concession and a guarantee. They mak the Government to interfere and bring diplomatic pressure to bear on the Government of the chah. which, when a sudden rush of water comes on the occurrence of a rain atorm, is forced through the connecting pipes into the houses, thus endangering the health of the occupants. Traps and other devices em-

ployed to prevent the passage of sewer gas are said to prove ineffective against the extraordinary pressure produced when a rusb of water fills the drains driving the accumulated sewer gas to find an outlet somewhere. It is therefore proposed to lay a separate system of sewers, properly ventilated and scientifically constructed, for the conveyance of sewage alone, and from which surface water will be excluded. On the other hand, it is argued that with the great fall the newers and drains have in Hongkong, the city being built on a slope, the sewage should reach the sea before it has time to generate gas, for which reason the separate system is nanecessury, all that is required being to see that the sewers are so laid as to give them a sufficient fail. It is, however, admitted, we believe, that the separate system might be of some advantage on the Queen's road level.

But the sewers, even on the higher levels, do

the question is whether in Hongkong it is

siderable distances along comparatively level foads to collect the arways from the houses on each side, as in Caine Road and Holly. wood Road; affording almost as much opportunity for the accumulation of sewer gas as in Queen's road. There is, moreover, the liability of the sowers in the upper parts of the town to be filled with nozious gases ascending from the lower levels, even although they may have a sufficient fall to rapidly pass their own sewage downwards.

HONGKONG CLUB Hongkong, 8th October, 1888. NOW PUBLISHING. NEW & ORIGINAL SERIAL STORY FROM THE PEN.OF RIDER HAGGARD,

Author of "King Solomon's Mines," "Allan Quartermain," "She," "Jess." &c., &c. The Proprietors of this Journal are pleased to announce that they have, at a very considerable outlay, made arrangements with H. Rider. HAGGARD—the Author of the most popular and dramatic Stories of our day-by which their Readers will enjoy precedent perusal of a new

and unpublished manuscript Story from his pen. The Title of RIDER HAGGARD'S New Story is COLONEL QUARITCH, V.C. And the Opening Chapters appeared in THE "HONGKUNG DAILY PRESS" OF SATURDAY, 21ST JULY.

In this dramatic work, the author of "She make a new departure. Instead of placing his obaracters in lands remote from civilisation and subjecting them to influences of the most remarkable and unprecedented nature, he has here written an English treasure story of the present day. The hero is a soldier in the British army, SHIPS COMPRADORES, STEVEDORE a wearer of the Victoria Cross, who returns home from the recent operations in the Sondan, to exchange the perils and privations of warfare in FRESH the desert for a series of sensational incidents among pleasant English landscapes, and ultimate reward of an ancestral home brightened by the beauty of a comely bride. The plot is well contrived, there is strong individualisation in the characters; the scenes are depicted with plearness and a warm glow of local colour, while the main incidents are worked out with power. Not even in "King Solomon's Mines," when en. SIDENCE. trame is effected into the mysterious chamber, is the thrill greater than when Colonel Quaritch at a molerate rate. unearths the treasure, hidden away from Cromwell's soldiers, the recovery of which saves an ancient house from rain.
